SUMMARY

Full Stack Developer (MERN & MEAN) with hands-on experience building scalable web applications and AI-powered tools. Proficient in JavaScript, React.js, Angular, Node.js, and Python. Experienced in Agile development, RESTful API design, and NLP integrations. Seeking to contribute to high-impact engineering teams.

EXPERIENCE

Web Development Intern · Infotact Solutions · Remote

May 2026 – Present

- Developed a full-stack Smart Retail POS system on the MERN stack, implementing JWT-based role authentication (Admin, Manager, Cashier) with dedicated dashboards for each role.
- Diagnosed and resolved issues across authentication, inventory, and navigation modules — integrated the Inventory page with live backend APIs to replace static data, and designed a custom receipt-themed login UI.

Frontend Developer Intern · CodeAlpha · Remote

Jan 2026 – Present

- Developed responsive, accessible frontend interfaces using HTML5, CSS3, and JavaScript; built a reusable component library adopted across multiple features, reducing development time.
- Participated in Agile sprint cycles, conducted peer code reviews, and delivered iterative feature improvements in a cross-functional team environment.

PROJECTS

University Portal — LMS | Angular · Spring Boot · MySQL · JWT

2025-26

- Engineered a multi-role Learning Management System with secure JWT authentication, dedicated dashboards for Admin, Teacher, and Student roles, and modules for course management, assignment tracking, and internal messaging.

AI-Powered Skill Gap Analyser | JavaScript · NLP · AI APIs

2026

- Built a full-stack AI web application that parses resumes and job descriptions using NLP to identify skill gaps and generate personalized upskilling roadmaps, integrating third-party AI APIs for intelligent analysis.

Smart Internship App | Full Stack · RBAC · MySQL

2026

- Developed an internship management platform with role-based access control enabling students to browse, apply, and track applications; implemented a secure database layer with structured data handling and scalable architecture.

Interview AI | React.js · Node.js · Express.js · MongoDB · Gemini AI

2026

- Built an AI-powered interview platform leveraging the MERN stack and Gemini AI to deliver personalized mock interviews, AI-driven feedback, coding challenges, role-based authentication, performance tracking, and a fully responsive user interface for enhanced interview preparation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, C Programming

Frontend: React.js, Angular, HTML5, CSS3

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Cloud & DevOps: AWS, Git

Core CS & Other: Data Structures & Algorithms (DSA), RESTful APIs, NLP Integration, JWT, MS Office

EDUCATION

B.Tech — Computer Science Engineering

Expected May 2027

Centurion University of Technology and Management, Paralakhemundi, Odisha

Class 12 · Bihar School Examination Board (BSEB)

March 2023

Class 10 · Bihar School Examination Board (BSEB)

August 2021

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Prompt Engineering · Oracle Cloud Infrastructure 2025 Certified Foundations · Google Generative AI · Google Gemini
- HackerRank JavaScript (Intermediate) · GeeksForGeeks Certification · TECHFEST Hackathon Participant · Advanced Java by Itronix
- Anthropic Skills · Xperia Hackathon participant
